CLASSIC HEARTH[®] VENT-FREE FIREPLACE SYSTEMS

VANGUARD[®]
VENT-FREE GAS HEARTH PRODUCTS

VANGUARD FULL-SIZE CLASSIC HEARTH® VENT-FREE GAS FIREPLACE SYSTEMS.....

.....**CREATE A FIREPLACE INSTANTLY!**

A Vanguard Classic Hearth Vent-Free Gas Fireplace System offers you the most economical and convenient way to add the beauty of a fireplace to your home.

A Classic Hearth gives you the attractiveness of a real wood burning fireplace with the heating efficiency and warmth of vent-free gas space heating. No chimney or venting is required so installation is a fraction of the cost of installing a woodburning fireplace.

These complete systems include a zero-clearance firebox, high efficiency vent-free gas logs, brass or black louvers and concealed controls. Choose between thermostatic, variable manual, or remote control ready models. The new Classic Hearth with Catalytic 2000 Technology further purifies the already low levels of combustion by-products. An optional brick liner and several mantel and hearth base designs are available.

Fireplace Beauty with The Efficiency Of Vent-Free Technology

Classic Hearths provide up to 33,000 Btu of clean, quiet, odorless heat. Enough to heat up to 1,100 square feet for only pennies an hour. With Classic Hearth's clean burning, 99% heat efficient burner design, the gas logs operate without a chimney. No outside venting is required so you eliminate heat loss and cold air drafts.

Ordinary vented gas fireplaces and wood burning fireplaces operate at much lower efficiencies and significantly higher costs, allowing beneficial heat to escape out the vent pipe or up the chimney. Also, since a Classic Hearth operates without electricity, it is the perfect alternative for emergency heat during power outages.

The Ultimate In Heating Comfort

There are a variety of models so you can select the comfort setting that best suits your needs. The thermostatically controlled model will automatically modulate to maintain your desired heat output, while the manually controlled model allows you to select the heat setting and flame height you prefer. Classic Hearths that are remote ready offer you the choice of four types of optional remote controls as well as the ability to operate the fireplace with a built-in variable manual control.

As Low As 1/3rd The Cost Of A Wood Burning Fireplace

Lowest Installation Cost	1 1/2 x Vent-free Installation	2 x Vent-free Installation	3 x Vent-free Installation
Vanguard Vent-Free Gas Fireplace Includes Firebox, Gas Logs, Mantel and Installation	Direct Vent Gas Fireplace Includes Vent Pipe, Firebox, Gas Logs, Mantel and Installation	Manufactured Wood Burning Fireplace Includes Firebox, Stovepipe, Chase/ Flue, Mantel and Installation	Masonry Wood Burning Fireplace Includes Brick/ Mortar, Flue, Damper, Mantel and Labor

DETAILING

Great Looks... Same Unbeatable Performance

models with golden oak logs. Both offer unparalleled safety and heating efficiency but now you can select from two great appearances.

Yellow Flame Models offer Flame-Max™ Golden Oak Logs

New for '98... these Classic Hearths feature full-size golden oak logs and the Flame-Max Dual Burner for the ultimate flame presentation. The revolutionary four log one-piece design assures proper log placement.

The upper face panel and lower door feature textured charcoal paint and attractive heat circulating louvers.

Flame-Max Classic Hearths are equipped with remote ready controls. This design offers you the choice of four types

of optional remote controls as well as the ability to operate the fireplace with a built-in variable manual control.

Optional remotes include an on/off wall switch, a thermostat wall control plus an on/off or thermostat hand held remote control.

The optional manual or automatic blower can be installed to improve heat distribution. These fireplaces offer 33,000 Btu. enough to heat up to 1,100 square feet.
